---

## EDUCATION

**California State University, Chico**  
**Bachelor of Science in Computer Science**

*Expected Graduation May 2022*

*Cumulative GPA 3.56*

---

## SKILLS AND KNOWLEDGE

- **C++:** Proficient programming. Courses taken include CSCI 111: Programming and Algorithms I, and CSCI 211: Programming and Algorithms II. Concepts covered include data encapsulation, dynamic memory management, recursion, and data structures, such as linked lists, stacks, queues, and trees. Numerous projects completed, including a simulation of a fast mart using priority queues.
  - **Python:** Proficient programming. Self taught through the Udemy course “Complete Python Bootcamp.” Concepts covered include data encapsulation and data structures. Completed projects include simulations of black jack and tic tac toe.
  - **Full Stack Web Development:** Beginning to educate through courses on Udemy. Learning Django, Javascript, GraphQL, HTML, CSS, and React.
  - **Assembly Language Programming and C:** Basic knowledge. Took EECE 237: Embedded Systems Design. Concepts covered include data registers, port initialization, and interrupt handling. Completed several projects with the ARM Cortex-M Microcontroller.
-
